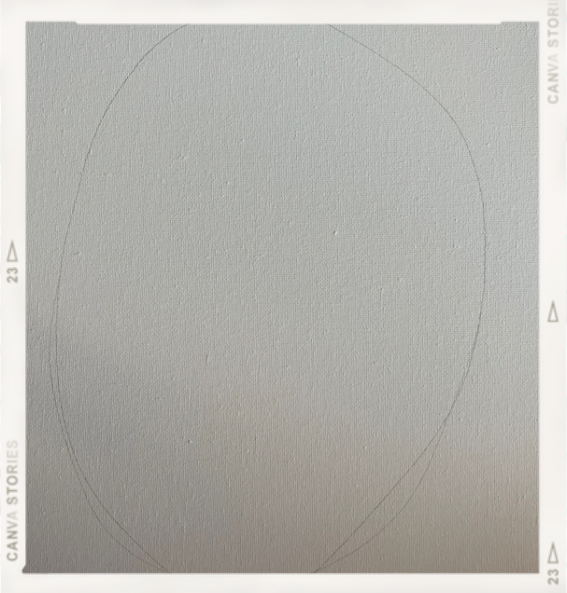
How to - Easter Art

Materials:

- 12 " x 16" canvas
- watercolour pencils
- Small paint brush
- container of water
- masking tape
- Bunny template
- led pencil
- Eraser

Drawing

Trace out the template onto your canvas in a led pencil, very lightly, enough to see the line but not too hard that it can't be erased.



Masking up

Cut small strips of masking tape and start to follow the line around your whole design. As you place the tape around the design, avoid taping on top of the pencil marks.

SMART care
community support

Painting

Once you've completed taping up, use the watercolour pencils to create your design inside of the marked up area. Use the paint brush to spread out the colours and watercolour paints across the canvas.

BONUS - Easter egg Rocks

With some rocks you may have collected, you can paint the rock to resemble Easter eggs.

Paint the entire rock to start, and add patterns or paint different layers and colours onto the rocks.
